

Web-Lutra available as Docker image

- New releases will now be available as Docker image
 - From next release
 - Will be build and made available automatically
- Currently contains a Tomcat server running Web-Lutra
- In the future will also contain the REST-API
- We are looking for help hosting a running version as demo and for use by our students (with automatic deployment)
 - Please contact me if you have an environment we could use ^{^^}
- Get the image here:
